Power of Team Spirit to Gain Creative Confidence

“Be the cause of happiness for others” - Atharva Veda

We all understand the sweet language of love. A family runs on the principle of love and sacrifice. Inner joy unites us. The unity makes us strong persons. Inner joy is the cause of optimism. Inner joy is our best friend. Out of world happiness is the cause of harmony between us. The company of the creative persons create the creative talents even among the weak persons. The outstanding success of ISRO is due to the vast team spirit of scientists. Bigger the team “Bigger the success”. The modern scientists are teaching us to become brave persons like themselves. Friend in need is true friend indeed. United we stand courageously. Divided we fall. Some persons are designed by God to be kind. If we make an error in judging the character of a person, it may be a fatal error. There is no good friend as loyal as a good book (like Upanishads etc.). Students are the best teachers of students. Company of a few honest persons is holding together the whole world. Good friends give us happy thoughts. The pure thoughts have healing power. Lucky time comes after unlucky times automatically. Out of world happiness is deeper within us all. Time is eternal. Please do not do business with your true friends. Synchronization of team is essential. We should become strong persons. Choice is yours how you become strong persons. The great persons rely on their intuitions. Creative talents create money and fame. The great teachers weed out the inferiority complexes of their students. Respect should be commended and not demanded. Inner joy will revolutionize the whole world. The inner happiness of the nature is enjoyable. A team which eats tasty food together, stays together. If you share your happiness, your happiness will increase. Share your ideas freely with others. Practice makes a team perfect.

The leaders are adored in their lands only. But the humble scientists are adored in the whole world. The scientific societies are now morally stronger than the religious societies. It is because the most intelligent people go to engineering and science. The scientific societies are incredibly the most honest societies compared to the cheating religious societies. The scientists and engineers do not have the freedom of telling lies as they have to give a large number of proofs repeatedly. The top scientists and engineers are optimistic. Science is definitely superior to all the religions in thoughts and actions by Mercy of God. It is very difficult to develop enthusiasm of hard work. Brave persons are lucky persons. Teachers should teach the difference between the facts and fictions. The team spirit may be created by appreciation of works of each other. The team spirit helps in the crisis management. There is a way to greatness. The way to greatness is originality. Thus the spirit of science should be preserved. Adventurous sports under guidance of experts can make you adventurous. The brave nations are lucky nations. The nature recreates the happy seasons automatically as in the past, so in the future also. The nature creates soothing music. *The nature has created cyclically many hearers on the planet earth. Please visit these heavens.* Settle wherever you like. Invisible God appears to be helping India to regain its pristine glory now. Entire Himalaya will get developed as one of the best tourism resort by God. Bless of seeing the beautiful nature too comes from deeper within us.

We should believe in the justice of Invisible God in the long term (40-50 years). Repeated experiences still prove the rare-hidden-divine justice. Societies are known to be self corrective after a long time. God is Invisible. But rare great Mercy of God is visible. Invisible God is the cause of blissful thoughts. Invisible God is far more blissful than all the scriptures as words cannot describe bliss or even ordinary experiences. So prayers change the unfavourable circumstances into the favourable circumstances. God of Bliss is also a Cosmic Healer. Invisible God loves his praises. Be positive. Truth is God. Miracles happen rarely in our lives due to Invisible God. Join hearts with love. God has been inspiring many scientists to carry out-standing original researches. God is with India. The respect to Indian scientists is increasing now all over the world.

The ultimate goal of life is to develop our noble characters, no matter what happens. This is true even for the enlightened persons or devotees of God. So search for a company of creative persons. The noble thoughts lead us to the noble actions. Current examples of man of noble character are Mr. E. Sreedharan, H.E. Narendra Modi and H.H. Ramdev etc. Truth is the future culture. Introverts are always happy. Please realize that we are inter-connected with the whole world. We should be job creators and not job seekers. The bachelor leaders are doing much better than the married leaders, as expected. If you follow your own (pure) conscience, you will be successful in 70% cases. This is the law of success. A team always wins. India should make efforts to spread kindness all over the world. Time heals. But love heals faster. Life is medicine of life. Knowledge is 100 % useless without the timely crisis management. Be

prepared for the worst and hope for the best. Recite the name of God. It is strange that bliss is deeper within even in crisis. So let us be independent.

No pain, No gain! Fair-healthy-creative competitions have created many originally creative nations. Uncompassionate societies are collapsing nowadays. Compassionate and brave actions are stable nations. Life is governed by the laws of economics plus luck. But bliss is deeper within all of us. Biosciences, biotechnology and genetic engineering will solve our many problems in the future. It is because healthy life has many beneficial properties, though matter has decaying properties. All species are minimizing the use of heat energy. We should also minimize the use of heat energy to create orderliness in ourselves. The beauty is the law of the nature. The nature is an artist. India should now try to win hearts of the whole world. Good training makes a team to receive outstanding success. Education is cultivation of healthy habit.

The inner journey to inner bliss is just beyond over hearted towards evil. God helps us in our journey to bliss deeper within us. Thus ignorance is bliss. Forget the whole universe. Out-of-world bliss is deepest within us. Sufferings are essential to rediscover bliss deeper within us. Contentment is bliss indeed. Fears help us to prepare well. Innermost truth is the most blissful. May God make us cheerful and blissful... True friend is forever. Nations cannot become the rich nations without honesty.

New inventions have transformed the whole world. One should try to write a research paper which takes him/her to the top and keeps him/her there forever. Seekers of pleasures rarely become scholars. As simple life is stable but the complex life is unstable. Simple system replicates itself fast. Strength and weaknesses go together both in matter and life. No one is perfect. So nations should simplify their life styles in order to be stable. Loveless societies will also collapse. Anxiety or rise in entropy (disorderliness) can be reduced by growing herbal ecosystem. Silence never creates wars. The peaceful minds will lead to the peaceful actions. Like-minded people flock together automatically. Only alternative to hard work is organised hard work.
